```java
import java.util.Random;
abstract class MyProject
{
abstract void OTP();
}
class AnonymousRandom
{
public static void main(String[] args)
{
MyProject mp = new MyProject()
{
public void OTP()
{
Random r = new Random();
int otp = 10000 + r.nextInt(90000); // 5-digit OTP
System.out.println("Your OTP is: " + otp);
}
};
mp.OTP();
}
}
```
